### A Speical Dream

John had a special dream yesterday. While he was reading a science fiction book, he thought, 'If I become an astronaut, I will walk on the moon and chat with the aliens there.'

John dreamed that he was one of the astronauts that was on the moon. He was jumping super high with no gravity. Suddenly, he saw a spaceship landing near him, he thought the aliens was very friendly. At first, he tried to communicate with them but one alien tried to attack him! John tried to escape from his laser beam so that he could stay alive. But, the spaceship chased after him so he woke up! Then he thought that was a dream only so he just forgot it and slept again.

John thought that not everything is as simple as it looks, so he needs to be careful whenever he meets anything or anyone new!
